Making Chocolate Milkshakes

David and his little brother like to make chocolate milkshakes. David gets two glasses from the shelf and two spoons from the drawer. Then he carries the container of milk from the refrigerator to the table. His brother Ryan gets the chocolate ice cream. David pours the milk into the glasses. Ryan adds the chocolate ice cream. They each take a spoon and stir the milk and ice cream. Then they add whipped cream and a straw. Finally, they lick their spoons and drink their homemade chocolate milkshakes.

1

Ryan's job was to

- pour the milk
- get the spoons
- add the chocolate ice cream
- add the whipped cream

3

What did the boys do last?

- stir the milk and ice cream
- lick their spoons
